WE CONNECT THE E-POWERTRAIN

industry. e-mobility. medical technology.

AN EMISSION-FREE FUTURE WITH OUR COMPETENCE CENTER

Our goal is not only to drive the energy transition and create a sustainable future, but also to improve the quality of life in cities. By **electrifying vehicles and machines**, we can help to make urban life emission-free and thus create a future worth living.

Especially in urban areas, we can **drastically reduce emissions** through the use of electric motors. We can also minimise environmental pollution by using low-emission technologies on construction sites. With our innovative technologies and solutions, we can help to reduce CO₂ emissions to a minimum. Join us in **taking a step towards a more sustainable future!**

OUR DEVELOPMENTS

Powerful

Less emissions
and noise

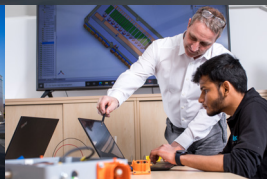

User-friendly

Conserving
resources

INSIGHT INTO OUR SERVICE PORTFOLIO

- Design and development
- Prototyping and documentation
- Concept creation
- Quality management and testing
- Assembly, documentation, logistics
- Fulfilment of safety requirements
- Customer-specific services

EFFICIENT ENGINEERING SOLUTIONS FOR THE FUTURE

The in-Tec Project & Competence Center offers engineering services and project support for the industry, automotive and medical technology sector. The company benefits from the synergies that result from the cooperation with the in-Tec Bensheim HV team.

SERVICES FOR ELECTROMOBILITY

Our experts offer solutions and concepts for distributing, connecting, securing and switching in high-voltage applications.

PARTNER FOR MEDICAL TECHNOLOGY COMPANIES

Medical technology projects are special. We know the difference to other industries. Experienced project managers in medical technology support you as required.

INDIVIDUAL PDUS AND FUSE BOXES

The competence center takes over the complete development of PDUs or fuse boxes for company's own or required application.
